

GEM Übung: **Blatt 7** Mitschrift

Kevin Meyer

14. Januar 2014

1 Aufgabe

1.1

$$n_N = \frac{f_1}{p} = \frac{50 \text{ Hz}}{2} = 1500 \frac{1}{\text{min}}$$

1.2

$$X_d = X_{1\sigma} + X_{1h} = \dots = 21,8 \Omega$$

1.3

2 Aufgabe

2.1

$$U_{ip} = \sqrt{2} \cdot M_{21} \cdot \omega \cdot I_2$$
$$U_{1N} I_{02}$$

$$M_{21} = \frac{U_{1N}}{\sqrt{2} \cdot I_{02} \cdot \omega} = \dots = 127,9 \text{ mH}$$

2.2

$$I_K = \frac{U_{1N}}{\bar{Z}} = \frac{U_{1N}}{X_d} = \dots = 166,85 \text{ A}$$

3 Aufgabe

3.1

$$\begin{aligned}|I_{N1}| &= \frac{S_N}{3 \cdot U_{1N}} = \dots = 229,1 \text{ A} \\ \varphi &= \arccos(-0,8) = \pm 143,1 \text{ deg} \\ \varphi &= -143,1 \text{ deg weil Generator übererregt.} \\ \vec{I}_{N1} &= |I_{N1}| \cdot e^{j\varphi_I} = 229,1 \text{ A} \cdot e^{j+143,1 \text{ deg}}\end{aligned}$$

3.2

$$\begin{aligned}P_{N1} &= \cos \varphi \cdot S_N = 0,8 \cdot 2,5 \text{ MV A} = -2 \text{ MW} \\ P_{mN} &= P_{N1}\end{aligned}$$

3.3

$$M_{iN} = \frac{P_{mN}}{\omega_N} = \frac{-2 \text{ MW}}{2\pi \cdot n_{\text{syn}}} = \dots = -12,73 \text{ N m}$$

3.4

$$\begin{aligned}\vec{U}_{ip} &= U_1 - jX_d \cdot \vec{I}_1 = 3637 \text{ V} - j21,8 \Omega = 6,64 \text{ kV} + j3,99 \text{ kV} = 7,747 \text{ kV} \cdot e^{j31 \text{ deg}} \\ \vartheta &= 31,1 \text{ deg}\end{aligned}$$

3.5

$$M_K = 3 \cdot \frac{p}{\omega} \cdot \frac{U_{ip} \cdot U_1}{X_d} = \dots = 24,68 \text{ kN m}$$

3.6 Test

$$\begin{aligned}M_D &= -\sin \theta \cdot M_k \rightarrow \theta = \arcsin \left(-\frac{12,73 \text{ kN m}}{24,86 \text{ kN m}} \right) \\ \vartheta &= 31,06 \text{ deg}\end{aligned}$$

3.7

$$I_{2N} = \frac{U_{ipN}}{\sqrt{2} \cdot M_{21} \cdot \omega} = 136,3 \text{ A}$$

3.8

$$I_{2N} \Rightarrow \Phi_E$$

$$I_1 \Rightarrow \Phi_1$$

$$\epsilon_{\text{el}} = \varphi_{I2} - \varphi_{I1} = 360 \text{ deg} - 59 \text{ deg} - 143 \text{ deg} = 158 \text{ deg}$$

$$\epsilon_m = \frac{\epsilon_{\text{el}}}{p} = 79 \text{ deg}$$
